A Technical SEO Audit of www.coca-colacompany.com

August 2026

AUDIT METADATA

Scope at a glance

WEBSITE

www.coca-colacompany.com

AUDIT TOOL

SEMrush Site Audit

AUDIT DATE

August 3, 2026

CRAWL SCOPE

88 pages analyzed

Key findings

27
Invalid structured data

2
Duplicate meta descriptions

1
Broken internal image

0
404 errors

0
5XX errors

SEARCH VISIBILITY

SEO signals need attention

27
Structured data errors

2
Duplicate meta descriptions

8
Missing meta descriptions

32
Duplicate H1 + title tags

Structured data helps search engines interpret content; unique metadata improves relevance, click-through rate and visibility in search results.

CODE & HIERARCHY

Structure affects speed and discovery

88
Unminified JS / CSS issues

87
Pages at ≤10% text-to-HTML

88
Pages with multiple H1 tags

Lean code accelerates rendering. Clear heading hierarchy improves navigation, accessibility and search-engine understanding.

What is working well

- ✓ No 404 or 5XX errors
- ✓ Good website crawlability
- ✓ HTTPS properly configured
- ✓ No broken internal links
- ✓ Website indexed correctly
- ✓ Strong technical foundation

PRIORITY ISSUES

Where to focus next

1. Fix 27 invalid structured data items
2. Repair 1 broken internal image
3. Write metadata: 8 missing, 2 duplicates
4. Resolve 32 duplicate H1 / title tags
5. Minify JS and CSS: 88 issues
6. Improve text-to-HTML ratio on 87 pages
7. Use one H1 per page across 88 pages

PRIORITIZED ACTION PLAN

Fix → optimize → monitor

01
Fix structured data with Rich Results Test

02
Add unique, descriptive meta descriptions

03
Resolve duplicate H1 and title tags

04
Minify JavaScript and CSS

05
Improve text-to-HTML ratio

06
Fix broken internal image

07
Use one H1 tag per page

08
Perform regular SEO audits

09
Monitor Search Console + Analytics

CONCLUSION

Strong foundation.
Clear path forward.

Address structured data and metadata, minify code, and improve the content-to-code ratio. These focused improvements will strengthen SEO, enhance user experience and increase search visibility.
